Dear Parents and Carers,

MyChildAtSchool (MCAS) App – Strengthening Communication Between Home and School

As many of you know, All Saints' CE Primary and Nursery School has recently moved to **Bromcom** as our Management Information System (MIS). As part of this transition, we are now asking all parents and carers to download and use the **MyChildAtSchool (MCAS)** app, which will become our main platform for communication and access to key information about your child.

MCAS is a secure and user-friendly app that provides a convenient way to stay connected with school life. By downloading the app, you will have easy access to a range of information and services, helping us to strengthen communication and ensure that important messages reach you quickly and efficiently.

Through MCAS, you will be able to:

- Receive school messages and announcements.
- View your child's attendance information.
- Update contact details when required.
- Complete data collection forms and consent requests.
- Receive notifications directly to your mobile device.
- Book parents evening appointments.
- Make dinner choices and payments.
- Make payments for trips, clubs and activities.

What Happens Next?

Over the next couple of days, you will receive an **invitation email** containing details of how to activate your MCAS account and download the app.

The **MyChildAtSchool (MCAS)** app is available free of charge from:

- The **Apple App Store** (iPhone and iPad)
- The **Google Play Store** (Android devices)

Simply search for **"MyChildAtSchool"** and follow the instructions to install the app and activate your account.

If you do not receive your invitation email, or if you experience any difficulties logging in, please contact the school office and we will be happy to help.

Looking Ahead

We would like all parents and carers to have downloaded and activated the MCAS app by the start of the new school year in **September**. Having all families connected through the app will help us ensure that important information, reminders and updates are received quickly, securely and reliably.

Initially, we will be using MCAS primarily for communication and notifications. Once we are confident that the majority of parents and carers are successfully using the app, we will begin to introduce additional features and services available through MCAS, such as online forms, trip consents, payments and access to further information about your child.

We will keep you updated throughout the year and share a timeline outlining when new features will be introduced, ensuring that everyone has time to become familiar with the app before these services are rolled out.

As we continue to develop our use of Bromcom and MCAS, we are excited about the opportunities they provide to improve communication between home and school and make accessing information easier and more convenient for all our families.

Thank you for your continued partnership and support.

Yours sincerely,

Eleanor Fussell
